EPA Lead Inspector Signature/Date			
	Kent W. Sanborn		Date
Supervisor Signature/Date			11 SEPT 2019
	Guy Tidmore		Date

## **Section I – INTRODUCTION**

### **PURPOSE OF THE INSPECTION**

EPA Region 6 inspector K.W. Sanborn visited the Petrolia Energy Corporation oil and gas facility located at latitude 35.789113 and longitude -96.242663 near Slick, Oklahoma on 08/29/2019 for an unannounced inspection. There were no representatives of Petrolia Energy Corporation present for the inspection. The inspection was conducted by authority of the Clean Water Act and the Safe Drinking Water Act to determine compliance with the Environmental Protection Agency (EPA) regulations.

### **FACILITY DESCRIPTION**

This facility is located on the SUDS Waterflood Unit and EPA was in contact with Oklahoma Corporation Commission at the time of the inspection.

## **Section II - OBSERVATIONS**

During the inspection, I observed a production well had leaked recently. The leak had been stopped, but the surface area was damaged near the well. The salt water facility (SWF) had a secondary containment pit that was full of fluids during the inspection. I observed visible surface damage outside of the pit that flowed east down the hill from the SWF. At the time of the inspection, the main tank battery was temporarily inactive. I did not observe a separator on site. There were six large tanks with no berm at the main tank battery area. The operational status of the lease was unknown at the time of the inspection.

## **Section III – AREAS OF CONCERN**

There was visible damage from previous leaks from a production well on site and the SWF. The status of the lease was unknown.

## **Section IV – FOLLOW UP**

EPA water enforcement will refer this facility to EPA SPCC program.
